ATRIUM HEALTH SACS ACHD SYMPOSIUM

2024
ACHD

SACS 50th Annual Meeting
Atrium Health SACS ACHD 4th Annual Symposium
July 18th-21st, 2024 • Wild Dunes Resort, Isle of Palms, SC

An Invitation From Our Chairs

The South Atlantic Cardiovascular Society was established over 50 years ago with the goal of bringing cardiologists, cardiac surgeons, APP's and other specialists together to discuss complex clinical cardiovascular cases and the factors that impact our patients.

In July 2021, we held our first South Atlantic Cardiovascular Society Adult Congenital Heart Disease Focus Sessions. Close to 40 participants discussed ACHD topics in a very interactive and collegial form during that inaugural meeting. The feedback from the first and subsequent ACHD Focus Sessions has been extremely positive and set the stage for annual ACHD meetings.

Our goal is to create and provide an environment of learning based on the discussion regarding complex congenital heart disease cases and foster professional relationships amongst ACHD Care Teams from the Southeast and beyond.

We hope that you can join us and look forward to seeing you in South Carolina, July 18th-21st!

ACHD Co-Chairs
Arwa Saidi, MB BCh & Jorge Alegria, MD

ABOUT SACS

The South Atlantic Cardiovascular Society (SACS) is a not-for-profit, professional organization that works to promote the advancement of current knowledge and skills in the field of cardiovascular care, and improve cardiac patient care.

We accomplish this by providing an environment at our Atrium Health SACS ACHD Symposium which encourages cardiologists, cardiovascular surgeons, and APPs to engage in discussions regarding the optimal treatment of cardiac conditions – whether medical or surgical. SACS is governed by a Steering Committee of distinguished cardiologists, cardiovascular surgeons, and advanced practice providers. When developing each year's program, the committee strives to identify and address the challenges cardiac care professionals face in their daily work, balancing this with a look for a future filled with evolving technologies.

The core of the organization is comprised of cardiac-care professionals in the South Atlantic states of Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee, Virginia and the District of Columbia. However, SACS is open to all cardiac healthcare professionals.

ABOUT ATRIUM HEALTH

Atrium Health is a nationally recognized leader in shaping health outcomes through innovative research, education and compassionate patient care. Based in Charlotte, North Carolina, Atrium Health is an integrated, nonprofit health system with more than 70,000 teammates serving patients at 40 hospitals and more than 1,400 care locations. Atrium Health is part of Advocate Health, the fifth-largest nonprofit health system in the United States, which was created from the combination with Advocate Aurora Health.

Atrium Health Sanger Heart & Vascular Institute has been committed to delivering world-class cardiovascular care for more than 50 years. Nationally and internationally recognized experts provide patients access to the most comprehensive care, ranging from general cardiology to the highest surgical complexity, including adult and pediatric heart transplant programs. The highly specialized care includes the only heart transplant program in the Charlotte region and the only program in the Southeast to offer minimally invasive heart bypass surgery.

Atrium Health Levine Children's in Charlotte, NC, provides an unmatched level of expert care in more than 30 areas of pediatric medicine. As the largest children's hospital between Atlanta and Washington, DC, they have been named a Best Children's Hospital by U.S. News & World Report for 15 years, making them the only children's hospital in the region to be nationally recognized. They are ranked in multiple pediatric specialties, including cardiology & heart surgery. Levine Children's Congenital Heart Center is the region's premier cardiac program, caring for patients from in-utero all the way through adulthood, with the region's only pediatric heart surgery program, pediatric cardiovascular intensive care unit and cardiac neurodevelopmental program.
